

Need a more human interface to the Web?

- The **VIRTUAL LIBRARY** is a catalogue of the Web created by humans for humans.
- The **VIRTUAL LIBRARY** has been in operation since 1991, when it was established by Tim Berners-Lee.

- The **VIRTUAL LIBRARY** consists of 263 individual catalogues each maintained by its own 'librarian'. Maintainers come from some eighteen different countries around the World and include leading experts from academia, industry and the voluntary sector.
